

Your Partner in the Power Industry

HMA Land Services Ltd. is a full-service land and right-of-way acquisition and service company committed to providing unparalleled resources, solutions, and expertise to its valued clients in the Power Industry.

HMA is your trusted partner for all your land requirements for generating plants, transmission and distribution lines, substation sites, communication sites, office and equipment storage sites. HMA provides a complete range of land services to the power industry:

- *Preliminary Route Options and Study Areas*
- *Land Impact Assessments*
- *Public Notification and Consultation*
- *Project and Construction Management*
- *Professional Records Management*
- *Routing and Siting identification*
- *Land Administration*
- *Land Acquisition and Leases*
- *Regulatory support including surface rights proceedings*
- *Dispute Resolution*
- *Settlement of Damages*

HMA understands that your corporate reputation and ongoing relationships with landowners, communities, agencies, and stakeholders is core to your business. Our professionals understand industry rules and are experts in stakeholder consultation and can plan and/or coordinate stakeholder opportunities such as open houses to obtain public input.

HMA knows comprehensive data management is key to managing project information and overhead costs through effective scheduling and coordination.

HMA's Land and Data Information (LADI) System allows the project team to manage all confidential information and track project milestones including project notifications, stakeholder feedback, survey authorizations, land acquisitions, issues management, commitment tracking, right-of-way payment summaries and damage settlements.

The power industry is dynamic and HMA professionals maintain a high level of understanding of the ever-changing rules, requirements and regulations.
